

subli_COTTON

what Cotton is looking for

easy way for printing on cotton

paper transfer printing is now possible on any fabrics including Cotton / Rayon / Blended fabric

Printing on cotton become easy. Customers just use inkjet printer and heat transfer calendar machine for transfer printing on polyesters.

Mass production is also possible by roll_to_roll production, with best color and high fastness results.

- paper transfer with subli_COTTON (International patented) can be applied not only on chemical fiber such as Polyester but also on natural fibers such as Cotton, Rayon, blended fabrics, with great colors and high fastness results.
- Raw cotton fabrics without B/W treatment and colored fabrics, even black color fabrics can be sublimated with great colors, and fabrics will have water repellency at once, automatically. accordingly, customers are allowed to apply in various areas such as sneakers, Eco-bag, parasol, etc.
- Subli_COTTON, available in various weights 30, 40, 50, 80 gsm , and for woven and/or knit type. works with any printers for transfer paper printing which equipped Epson, Ricoh, Kyocera etc., print head.
- High fastness and water repellency of subli_COTTON can be applied to various applications such as Sportswear / T-shirt / Hand bags / Curtain / Sofa cover/ Cushion cover/ Blinder/ Wall cover / Shoes / out-door Tent/ etc.

International patented subli_COTTON requires a patent license agreement with d.gen in advance.
